## COLOUR VARIATION

can occur. When ordering your product, order all  
products of your project together to reduce the possibility  
of colour variation. We do not guarantee different  
batches will be the same colour.

## EFFLORESCENCE

Efflorescence (a salty deposit) is a natural occurrence  
in masonry products. Efflorescence does not affect  
the structural integrity of the product and will usually  
diminish and disappear in the course of time as the  
product is exposed to the elements. No responsibility will  
be accepted for the occurrence of efflorescence.
