

# The Premium Brick Collection®

The Premium Brick Collection® - Charcoal

At the forefront of contemporary design, the Premium Brick Collection® from Apex Masonry offers refined colours, clean lines, and unpretentious textures, setting a new benchmark for building design.

Along with specially chosen colours to suit modern, minimalist themes, our bricks have a consistent ultra-smooth texture, with uniform sizing and straight distinctive lines. The new Premium Brick Collection® also includes a specially formulated water repellent additive to protect the masonry units against efflorescence (lime leaching) and ensure long-term colour retention.

## FEATURES

- › Stylish colour range, with the colour extending right through the brick, i.e. not a thin surface coating that can chip off.
- › Natural sand aggregates and colour-fast pigments.
- › True to size, easy and quick to lay.
- › Packaged in specially designed strapped packs for easy handling on site.
- › Locally manufactured by a family run business.

## COLOURS - STANDARD RANGE

Charcoal

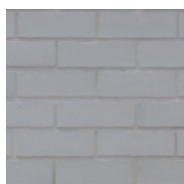

Pearl Grey

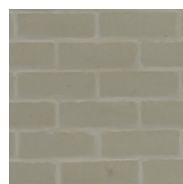

Mocha Ash

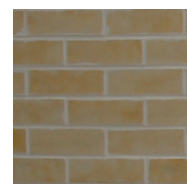

## COLOURS - DESIGNER RANGE

Polar White

Ivory

Gold Blend

\* Colour samples are provided as an indication of the colours and textures available. Some variations in colour may occur due to natural changes within the raw material source.

## FREQUENTLY ASKED QUESTIONS

**Q. Do you keep stock of all colours?**

A. Yes, lead times are minimal. However, it's a good idea to place your order as soon as you have chosen a colour.

**Q. Are the bricks likely to have any colour variations?**

A. Due to the changes in raw material, variation in colour can occur. When ordering your product, order all products of your project together to reduce the possibility of colour variation. We do not guarantee different batches will be the same colour.

**Q. Can the bricks be sealed to enhance the colour or for waterproofing?**

A. Yes, sealing the bricks is recommended. Use a high-quality penetrative sealer - not a surface sealer as it can breakdown due to UV. If used in a veneer construction, waterproofing is not required

**Q. The Premium Brick Collection® includes a specially formulated water repellent additive. Is there an additive for the mortar?**

A. Yes, we have a mortar additive used with our coloured masonry to complete the water Repellant system. Quotes and pricing will include the mortar additive.

**Q. Do you deliver direct to site, and what does the freight cost?**

A. Yes, we have our own fleet of delivery vehicles with both body trucks and semis available. All freight costs will be included in the quoted prices.

**Q. What do I use to colour the mortar?**

A. Your bricklayer will use a high quality powdered or liquid oxide. It is recommended to trial the colour matching first as sand colour variations can affect the finished-dried mortar colour.

**Q. Do your bricks come on pallets?**

A. No, the Premium Brick Collection® will be delivered in strapped packs making handling on site easy using traditional brick trolleys.
